Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

On 5/1/99 Elm Ridge Resources, Inc. attempted a Pictured Cliffs completion in this well bore. The well was perforated from 1602'-1604' and 1633'-1638'.The perf's were broken down with 500 gals. 15% HCL. The fluid was swabbed back with no show of gas and the well was shut-in for 10 days to observe any pressure build up. The well built 10 psi in 10 days. A cast iron bridge plug was set at 1580' above the Pictured Cliffs perf's. and the Fruitland Coal was perforated and tested. Commercial production was indicated and rhe well was shut-in pending NMOCD hearing approval on spacing. Approval was granted on 9/30/99 per NMOCD Order #R-11253. Elm Ridge now respectfully requests permission to abandon the Pictured Cliffs formation by leaving the cast iron bridge plug in the hole @ 1580'.

We approve only of temporary abandonment of the PC.
