Describe Cause of Problem and Remedial Action Taken.*

A leak in a 4" poly production flow line caused 1 bbl of oil and 7 bbls of produced water to leak onto the ground. Free-standing fluids including 0.5 bbl of oil and 3 bbls of produced water were recovered via vacuum truck and the line was repaired.

Describe Area Affected and Cleanup Action Taken.*

The affected area is approximately 30' x 900' on and off location. The leak is located approximately 1,000 feet North of the well head. Remediation will be completed in accordance with a plan approved by NMOCD.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
