Thank you Randy. As counsel for the landowner, I would like to know about these issues before they are determined. We will want to split samples with BP on the next round. Our environmental consultant is Beth McNally at Animus.

Please keep me informed prior to any further regulatory action on this site so that we may review and comment, where appropriate. I am copying Director Griswold with this email so that he is aware of our position, which I believe is entirely reasonable. As the governmental entity charged with enforcement under the Water Quality Act, it is simply not appropriate for BP and the OCD to make these joint determinations and for us to find out about them after-the-fact. BP has refused to provide information, stating only that we will get what they submit to the OCD. This process needs to end immediately. I am also copying Brad Berge, counsel for BP, so that he is aware of our position and provides reasonable notice of proposed additional sampling events.

Good morning Tom

Sorry to not informing you of the latest. The DIII environmental staff felt that additional sampling was needed. They closed the recent spill but required more sampling based on the historic spill sampling record.

Randy and Cory,

Attached is the GCU 170 groundwater activities and monitoring report with accompanying C-141. At this time, BP requests no further action at the location as documented in the C-141. Please review and let me know if you have any feedback.

Thank you,

Steve Moskal
