This plan is approved as written with these conditions of approval. If the attempted action to clean the over spray area is not affected than further work will be required. **This plan still needs to be approved by OCD.** BLM approval of this proposal does not relieve the operator of liability should their operations have failed to adequately investigate and re mediate contamination that may pose a threat to groundwater, surface water, human health, or the environment, or if the location fails to reclaim properly. In such an event that location does not re vegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws/regulations.

Bruce and Lara,

OCD approves your proposal for additional delineation of this site. In regard to your proposal for the overspray area, OCD will approve that proposal dependent on like approval by BLM. Additional remedial actions may be required in the overspray area if the surfactant spray is not effective.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: Apache Tony Federal #28 - Request to Begin Site Activities

The Apache Tony Federal #28 was sampled by RECS employees on July 31st 2014. Two surface samples were taken in the release area, and one surface sample was taken in the overspray area. All samples were taken to a commercial laboratory for analysis. Based on the laboratory data, Apache requests permission to wash the overspray area with Dawn dish soap and to conduct further delineation activities in the release area. An Initial Sampling Data map and the corresponding lab is attached.

If you have any questions, please let Bruce Baker from Apache know. Otherwise, we await your approval.

Apache will submit the initial C-141 for this site tomorrow.

Thanks!

Lara
