---

Clair,

This event has been dragging out for some time now. I would like to see a plan in place for approval by 6/27/14. The plan should include delineation samples to OCD specifications,  
map referencing spill,  
map showing area of disturbance to remediate the spill site,  
what is being removed,  
where it is going,  
where material is coming from to backfill,  
if liner is being used- what type, at what depth, and key depth,  
samples from sidewalls for horizontal delineation before backfilling will be required.

After plan is approved with any stips needed for the approval, work will be required to be started in 30 days and completed within 60 days. If you have any questions please let me know. Thanks.

Starting June 5, 2014

Estimated Time to Complete: 1 Day

Good Afternoon,

Tetra Tech will be on location to install boreholes and collect samples at the location listed above to define extents. Once defined, Tetra Tech will prepare a work plan for approval. In the event our proposed schedule changes, I will send you a follow up email. If you have any questions please contact me.

Thank you

***Clair Gonzales***
