Subject: Atom ANT Federal Com. #1 (3/6/2014 Release)
Date: Wednesday, September 17, 2014 10:56:46 AM

Sorry for the delay but I met with Duncan Whitlock and Jim Amos/BLM on August 20, 2014 to discuss remediation. It was BLM's recommendation to treat in-place the off location release area with applications of Micro Blaze for the next three months (September, October and November). The impacted soils on the production pad are currently being excavated and hauled to an NMOCDF facility, but with the rains there have been some delays. Once impacted soils are removed sampling will be conducted and when the release area sample results are within RRAL's for the site a Final C-141 will be submitted.

Please contact me with any questions.

Thank you.
