Subject: PLU 420
Date: Thursday, October 09, 2014 10:12:50 AM

Mike/ Heather

Per our meeting on Tuesday, October 7th concerning the remediation activities on the PLU 420. Sample point 1-5-6 was excavated to a depth of three feet, sample points 2-3-4-7 and 8 were excavated to a depth of two feet bgs. The area of sample point seven will be lined with clay. There are also two initial C-141's filed for this site and both have been addressed with this remediation (2RP-2250 and 2RP-2487). An email approval of these items discussed will be greatly appreciated, if you have any questions please let me know. Daniel with EPI will follow up with the closure report. Thank you for taking the time to meet and discuss this project. Thanks

Brad Blevins
