Re: Corrective Action Plan Amendment
LINN Energy, Barclay State Battery
Legal: Unit I Section 2 T23S R31E, 660 FSL & 1980 FWL, Eddy County, NM
Lat-Long: 32.331253 – 103.742502
Event No. (OCD): 2RP-Pending

Dear Mike:

Etech Environmental & Safety Solutions, Inc. (Etech) submits the following amended corrective action plan on the aforementioned site for your review and approval.

Current Project Status

1. The status of the remediation of the site to date is as follows:
2. The impacted area on the north side of the tanks, SP1, SP2, SP3 (approximately 146' by 25') has been excavated to a depth of 3 feet vertical. Around the tanks and on the south side of the tanks, SP4, SP5, SP6 (146' by 6') due to safety reasons, the excavation is at a depth of 8".
3. There are numerous lines and an electric pole within the confines of the south side of the excavation. Also, the area between the tanks and the road is approx. 6'.
4. The bottom of the excavation still has elevated levels of chlorides ranging from 5840 to 5640 mg/kg. A map showing the sample locations and analytical results along with a copy of the analysis is attached.
5. The proximity of the tanks, lines, and electric pole has restricted further excavation due to safety concerns. Two (2) soils borings via hand auger were advanced within the bottom of the excavation to attempt to delineate the vertical extent of the impact. Refusal was encountered at 4' for SP4 (5840 mg/kg) and 10' for SP5 (5680 mg/kg). The

chlorides were still above regulatory threshold levels. The results of the laboratory analysis of samples collected from the bottom of the soil borings are attached.

A photograph of the site is provided below:

Proposed Corrective Action

LINN is proposing an amendment to the corrective action to this site. The factors used to determine this corrective action include first the safety of all persons related to performing additional excavation within the site. In addition, based upon available data, groundwater in the area is believed to be in excess of 150 feet. The corrective actions evaluated for the site (based upon the above) are presented as follows:

1. Backfill with clean compacted fill material, and wet compact.
2. Apply a calcium amendment to the bottom of the excavation (gypsum) then backfill with clean compacted fill material.
3. Installation of a 20 mil polyethylene liner in the bottom of the excavation, then backfill with clean compacted fill material.

After review of the above options, LINN believes, the best approach is Option 1, because of the shallow depth of the excavation.

Thank you for your assistance on this matter. Also, attached is the initial C-141 for your reference. Should you have any questions, require additional information, or have any additional stipulations for this site, please contact Mr. Brian Wall at (575) 738-1739 (Office) or via email at bwall@linnenergy.com or myself at (432) 563-2200 (office) or via email at kit@etechnv.com.

Respectfully:

Kit Prichard
Environmental Professional

RE: BARCLAY STATE BATTERY

Enclosed are the results of analyses for samples received by the laboratory on 10/21/14 16:30.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-13-5. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene". The signature is written in a cursive, flowing style.

Celey D. Keene

RE: BARCLAY STATE BATTERY

Enclosed are the results of analyses for samples received by the laboratory on 10/07/14 16:40.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-13-5. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene". The signature is written in a cursive style with a large, stylized 'C' and 'K'.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.
