E. This exception is requested for the following reasons: ___A dog leg riser was run over on Saturday causing that section of pipeline to be shut in. The well suffers from severe paraffin problems and a short shut down period could result in a timely and costly workover to return the well to production. The location is not equipped with a flare so the gas would be vented until the sales line is active again. I have spoke with Enterprise and the one call is up on Wednesday the 25th. They will uncover their line and assess the situation from there. Line could be returned to service as shortly as the afternoon of Wednesday the 25th, but if more repairs are needed I will not know a good timeline until after they look at their line._____
