RE: COG \* SRO State Com 5H \* 30-015-37425 \* M-8-26s-28e \* **2RP-2383** \* DOR: 7/1/14

Amanda,

Your remediation proposal is approved for a 1' removal of material across the area identified as S-1 through S-5 (on the well pad). In the areas identified as S-6, S-9 and S-10, you are approved for a 3' removal of material. In the area identified as S-7, further delineation and deeper excavation, based on the results of the delineation, will be required. There is not an area identified as S-8 on the proposal. Confirmation sidewall samples will be required in the off pad area.

If you have any questions or concerns, please contact me.

Mike,

Attached is the work plan for the SRO State Com #5 per our verbal discussion on July 14, 2014. I noticed I mistakenly attached the work plan to the SRO State Unit #48 notification. Please disregard the last email with the SRO State Com #5 work plan. Please feel free to contact me if you have any additional questions or concerns.

Thank you,

Mr. Dade,

As a follow up to my previous email I want to notify you that at approximately 11:00 am this morning crews were able to kill the well and shut it in. A subsequent C-103 and C-141 will follow.

Thank you,

**Subject:** (Notification) SRO State Com #5H (30-015-37425)

Mr. Dade,

This is a written notification to follow up our verbal communications earlier today for SRO State Com #5H (30-015-37425) operated by COG Operating LLC. During a routine pump change, which required pulling the rods and pump it became necessary to pull tubing. At approximately 2:30pm on 7/1/14, while pulling tubing, the well kicked, and the BOP rams were unable to close around the tubing. We currently have a third party well service company on site to address the problem. The location has been secured by blocking the lease road for ¼ mile in both directions. We will be sure to notify you if additional information needs to be provided. Please feel free to contact me if you have questions or concerns.
