Gauge on well head broke. Vacuum truck and backhoe/roustabout crew was called.

Describe Area Affected and Cleanup Action Taken.*
An approximate area of 40' X 50' (all on production pad). No oil or produced water to recover. Impacted soils on production pad removed and hauled to an NMOCD approved facility. **Depth to Ground Water: >100' (approximately 264' per NMOSE & 300' per ChevronTexaco trend map), Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS 0. Based on minor amounts of oil and produced water released and impacted soils excavated/hauled, Yates Petroleum Corporation requests closure.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
