Vernon,

This looks like it will be ok to close. When you send in the closure report, please make sure to include a site map, explanation of work done, and a reference table that summarizes the lab data.

Thank you,

Heather Patterson

Subject: Emailing: Mewbourne-Waltersheid #1 Closure Request.pdf

Good Morning Mike,

Please see the attached supporting documents for this closure request for Mewbourne Oil Co's Waltersheid #1. As per our conversation the other day, I did go back and obtain a confirmation Groundwater Sample from a point approximately 807' SW of the open excavation. As we expected, this GW sample also indicated an elevated level of chlorides thus alluding to the fact that the release from the Mewbourne line had no impact on Groundwater. I am requesting closure for this project.

Thanks,
Vernon K. Black
