Mr. Amos,

I apologize for any confusion but no clean soil was blended with contaminated soil, RECS sampled soil as it was excavated and hauled off what was above regulatory standards and saved what was below regulatory standard. Then we blended the saved soil from the excavation without adding any clean soil to it. Then sent a composite of that soil to the lab as a representative sample.

Jacob,

The BLM is not crazy about blending chlorides with clean soil and utilize for backfill. In this case I would have liked to see the top 6' (3760) be removed and hauled to disposal, then I would be good for closure. thanks

Subject: Burnett Jackson B-5 gas line

All,

Attached is the excavation plat and lab data for the Burnett Jackson B-5 Gas line. RECS is requesting permission to install plastic liner and backfill excavation. Please feel free to contact me with any questions or concerns. Thank you.
