Thanks, that what we thought.

Your work plan is approved with the following exceptions:

- The OCD would like to see further delineation in the green and orange areas to show where they clean up;
- All three areas should be excavated to 6’;
- Backfill with 4’ of compacted caliche and 2’ of clean top soil.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Bob,

Who is the surface owner at this release site?

Heather,

Based on enclosed results of chloride delineation, upon NMOCD approval, Yates will conduct remedial action per the Work Plan, Scope of Work (September 22, 2014), with four (4) feet of impacted soils being excavated and taken to an NMOCD approved facility, then backfill with two (2) feet of compacted caliche as a barrier to prevent vertical movement of chlorides then two (2) feet of like topsoil as a vegetation cover.

Thank you.

Mr. Asher,

The OCD needs to review the full delineation of chlorides before a final remedy can be approved for this site.
