RE: Final Closure Report
Bopco, L.P. – PLU-CVX-JV-PC #006
UL-P, Section 33, Township 24 South, Range 30 East
Eddy County, New Mexico
NMOCD Reference # 2RP 2727

Mr. Bratcher:

The following *Final Closure Report* serves as a condensed update on closure activities for the above referenced Site.

Background Information:

A 1" valve connected to the lact unit- truck load line header broke, the valve was replaced. The spill impacted approximately 10,890 sq. ft. of caliche tank battery pad. A vacuum truck was dispatched to the site the same day but the oil had congealed to the point the vacuum truck could not pick up the fluid. The ground was frozen and covered with ice and snow. A temporary fence was built around the spill area. The next day a vacuum truck and a crew continued working on fluid recovery, a total of 40 bbls of melted snow and oil was recovered, the remainder of the oil soaked into the ground.

Remediation Activities:

EPI personnel mobilized on the site on January 14, 2015 to collect soil samples to determine the vertical extent of contamination. A total of ten (10) soil samples were collected from five (5) sample locations; SP1 – SP5. On January 16, 2015 eight (8) additional soil samples were collected from three (3) sample points; SP6 – SP8. All samples were sent to Cardinal Labs in Hobbs, New Mexico, for testing. Laboratory analytical results indicate that the excavation is void of Benzene, BTEX, and TPH concentrations in excess of NMOCD Recommended Remedial Action Levels (RRALs) of 10 mg/Kg, 50 mg/Kg, and 5,000 mg/Kg, respectively. Laboratory results indicate, with the exception of SP7 at three (3) and six (6) feet bgs, Chloride concentrations do not exceed NMOCD RRALs of 1,000 mg/Kg (reference *Figure 3* and *Table 2*).

The release area was excavated to a depth of one (1) foot bgs, two (2) feet bgs in the area of SP7, with approximately 1,014 tons of contaminated soil excavated and hauled to a state approved facility for disposal.

Closure Activities:

From January 30 – February 4, 2015, based on laboratory analytical data and NMOCD approval, the excavation was backfilled with approximately 1,014 tons of clean soil free of rocks, clumps or deleterious material. The entire disturbed area was then contoured to blend with existing pad area and protected against wind/water erosion.

Should you have any questions or concerns please feel free to contact me at (575) 394-3481 or via e-mail at ddominguezepi@gmail.com or Mr. Brad Blevins at (432) 214-3704 or via e-mail at bblevins@basspet.com. All official communication should be addressed to:

RE: PIERCE CANYON 33 FED 1H

Enclosed are the results of analyses for samples received by the laboratory on 01/16/15 15:37.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-13-5. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene". The signature is written in a cursive style.

Celey D. Keene
Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

P	33	24S	30E	350	South	350	East	Eddy

Latitude N 32.168137 Longitude W 103.878424

NATURE OF RELEASE

Type of Release: Crude Oil	Volume of Release: 40 bbls.	Volume Recovered: 20 bbls.
Source of Release: 1" valve on the lact unit/truck load line header	Date and Hour of Occurrence: 1/3/15 time unknown	Date and Hour of Discovery: 1/3/15 at 12:21 p.m.
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? NMOCD emergency #104 and the BLM	
By Whom? Tony Savoie	Date and Hour: 1/3/15 at 3:24 p.m.	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
A 1" valve connected to the lact unit- truck load line header broke, the valve was replaced.

Describe Area Affected and Cleanup Action Taken.*
The spill impacted approximately 10,890 sq.ft. of caliche tank battery pad. A vacuum truck was dispatched to the site the same day but the oil had congealed to the point the vacuum truck could not pick up the fluid. The ground was frozen and covered with ice and snow. A temporary fence was built around the spill area. The next day a vacuum truck and a crew continued working on fluid recovery, a total of 40 bbls of melted snow and oil was recovered, the remainder of the oil soaked into the ground. The spill area was left as is pending final remediation. The spill area will be cleaned up in accordance to the NMOCD and BLM remediation guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
