Re: Shiner Bock 1 Federal Com #1
30-015-42015
Unit H, Section 02, T17S-R31E
Eddy Co., NM

Mr. Mike Bratcher,

COG Operating LLC would like to submit for your consideration the enclosed work plan for the above captioned well. The plan is in response to a release that occurred December 18, 2014.

Background

The release was caused by a hole in a 4" gas line, and gas was ignited by static electricity from nearby power lines. This created a small fire and melted the 4" water line next to it. There was impact to the nearby pasture of approximately 2,300 square feet.

Groundwater

Based on the Chevron Trend Maps, the release area would be classified at a site ranking of Zero due to the depth of groundwater at approximately 200'. No well information could be found for Section 2, per NMSEO.

Soil Assessment and Analytical Results

Initial soil samples were taken on 2/6/2015. TPH and BTEX were tested at a depth of 1' for each of the sample points with results concluding non-detect. Chloride concentration in one sampling area (S1) were elevated, therefore samples were taken at 2', 3', and 4'. These results indicated concentrations favorable for surface reclamation. Sample points 2 and 3 showed chloride concentration favorable for vegetation regrowth. (See attached site diagram).

Work Plan

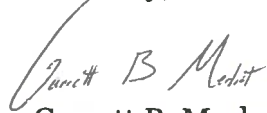

COG Operating LLC proposes the following work plan:

- Excavation of S1 to a depth of approximately 1.5'. The excavation area would be approximately 620 square feet and would be backfilled with like material.
- S2 and S3 do not require any further remediation as chloride concentrations are favorable for vegetation regrowth.

S1	Cl-
1'	11,300
2'	176
3'	272
4'	80
S2	Cl-
1'	304
2'	32
3'	112
4'	ND
S3	Cl-
1'	96
2'	ND
3'	80
4'	ND

If there are no objections or further stipulations, COG Operating LLC would like to begin the remediation process based on approval of this work plan. Please feel free to contact me with any questions or concerns at (432) 234-0590

Sincerely,

Garrett B. Merket

Environmental Coordinator

NATURE OF RELEASE

Type of Release: Produced Water	Volume of Release: 20 bbls	Volume Recovered: 0 bbls
Source of Release: Flowline	Date and Hour of Occurrence: 12/18/2014 8:16 am	Date and Hour of Discovery: 12/18/2014 8:16 am
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher – NMOCD / Jeff Robertson – BLM	
By Whom? Amanda Trujillo	Date and Hour: 12/18/14 4:54 PM	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

The release was caused by a hole in 4" gas line; gas released was ignited by static electricity from nearby power lines. This created small fire and melted 4" water line next to it. There was impact to the nearby pasture. The lines were isolated to stop gas and water.

Describe Area Affected and Cleanup Action Taken.*

An area approximately 30' x 50' was impacted in the pasture near the flowline. Concho will have the spill site sampled to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD for approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

RE: SHINER BOCK

Enclosed are the results of analyses for samples received by the laboratory on 02/06/15 15:30.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-13-5. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager
