Depth	Lithology	Description	Remarks
2000'		Sa Grey, Dolomite w/ anhydrite red) + Gypsum xls	
		Grey Dolomite, Clear Gypsum + white + red anhydrite	
		Gypsum + Anhydrite Lots of large clear gypsum xls	
2020		Gypsum, Anhy + dolomite	
		DK Grey dolomite w/ Gyp + Anhy.	
		DK-Green-Grey microxln dolomite	Looks stained
		DK Grey microxln dolomite	
2040		" Looks stained but	
		"	
		LT Grey Dolomite microxlyn.	
		" "	
2060		"	
		Red anhydrite + gypsum	Dolomite has Lots of clay in matrix - high clay residue in sample tray when dissolved in acid.
		Lt. Grey dolomite microxln -	
2080		Lt Grey to Green dolomite microxln -	
		more anhydritic w/ dk Grey dolomite	
2100		"	
		Lt. Grey dolomite	2 pieces Slow streaming cut, Gold fluorescence microxln dolomite
		dark Grey dolomite	
2120		Light tan dolomite - microxln	1 piece gold immediate cut.
		dark grey dolomite - microxln	
		Light tan to green dolomite microxln	
2140			tan xln ls w/ 2140-50 tan pieces very slow streaming gold cut - light F No fluor. or cut other zone
		"	
2160		Lt tan dolo vis visible ϕ	Inc of fluorescence good streaming gold cut
		* THIS DOLOMITE Visible PINPOINT ϕ macroxln	Large inc. of fluorescence good streaming gold cut
2180		Pelletoid Packstone	
		tan dolomite - inter x lan ϕ	Excellent fluorescence instant goldcut + odor
		* - excellent Visible PinPoint ϕ	best streaming gold cut 2190-220
