### NATURE OF RELEASE

| | | |
|---|---|---|
| Type of Release: Produced Water | Volume of Release: **30 bbl** | Volume Recovered: **15 bbls** |
| Source of Release: Bull Plug Broke | Date and Hour of Occurrence **2/26/15** | Date and Hour of Discovery **2/26/15** |

| | |
|---|---|
| Was Immediate Notice Given?   ☐ Yes   ☐ No   ☒ Not Required | If YES, To Whom? |
| By Whom? | Date and Hour: |
| Was a Watercourse Reached?   ☐ Yes   ☒ No | If YES, Volume Impacting the Watercourse. |

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*  The bull plug broke on the discharge line of the reda pump causing a release of 30 barrels of produced water.  The facility was shut-in, the plug was replaced and the facility was put back into service.  A vacuum truck was immediately called to the location and 15 barrels of produced water were recovered.   Talon/LPE was contracted to perform an initial site assessment and soil sampling.

Describe Area Affected and Cleanup Action Taken.*  The majority of the spill remained in the steel building under the equipment. However the berm was breached on the east side of the facility. Talon/LPE performed soil sampling within the impacted area. Upon receipt of analytical results from the soil sampling activities Talon/LPE drafted a work plan that was subsequently approved by NMOCD & BLM. Talon/LPE performed the work to the specifications laid out in the work plan, collected confirmation soil samples, and backfilled the excavation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
