Amy,

This closure has been accepted.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: Bass 003 SWD Review - Tomorrow?
Importance: High

Good Afternoon everyone! I hope your weekend was nice. I have attached a long awaited packet containing the details of BOPCO's reclamation of the Bass 003 SWD just north of Curry Comb Rd. Within it are the C-103 and the initial and final forms C-141 for your review and approval. This site is the location of the old SWD located on a slope to the SE where historical impact issues were addressed in the site reclamation. This site was discussed intermittently with you throughout the progress of field activities last year. It was extensively drilled for vertical delineation, then most of the site was excavated to two feet where a liner was installed. I would like to visit your office to discuss any questions or concerns you may have on our processes and data.

Please let me know if I can visit at 9 am tomorrow morning?

Thanks and have a great day ☺

Amy C. Ruth
