RE: Agave Energy * Comanche Compressor Station * E-34-7s-26e * Chaves County, NM
NMOCD Tracking Number: 2RP-2784 * Date of discovery: 1/6/15

Kerry,

Your proposal for remediation of the above referenced release is approved. A vertical and horizontal delineation with lab analyses will be required. Please submit the delineation results to OCD as soon as they are available. OCD approval will be required prior to backfilling any excavation with impacted material.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Subject: Comanche Compressor Station Site Work Plan

Mike,

After you had shown me how to access the documentation online the other day, I wanted to look up the paperwork concerning our spill at the Comanche Compressor Station. When I pulled up the paperwork, I noticed that under the Conditions of Approval section it stated "Submit Remediation Proposal No Later Than 3/4/15". I apologize for not seeing that earlier and getting you the site work plan (attached). When I submitted the initial C-141 I know we briefly discussed my plans for attempting on site remediation, which is the basis for the site work plan. Please review the attached document and let me know if you have any questions or concerns about it.

Again, I apologize for the delay in getting this to you. Going forward I'll make sure to regularly check the documents in the online system to ensure that I get any requirements taken care of in a timely manner.

Thanks,
Kerry Egan
