N/A

Describe Cause of Problem and Remedial Action Taken.*

2" steel injection line ruptured and released produced water into the pasture. The release is approx. 1000 feet due west of the Jackson B 19 WIW and approx. 500 feet South South West of the Jackson B 5 TB.

Describe Area Affected and Cleanup Action Taken.*

The approx. size of the release is two pooling areas that are 50'x60' & 60'x30' with a 5'-10' x 150' area as well. The impacted area will be sampled, and a work plan will be submitted once all information is collected.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
