Ms. Mathews,

Thank you for your C-141 submission and initial response to this spill. The OCD has opened an incident report and assigned it the tracking number 2RP-3163. The next step in this process will be a work plan with a full delineation. This is an area of known shallow ground water, so it is of particular concern to the OCD. Also, OCD records show that this site is on private surface and Federal minerals, therefore the BLM might need to approve your remediation work plan.

Thank you,

Heather Patterson

Good Morning Heather,
We have removed contaminated dirt, fixed hole and fixed berm around the tanks.
Can you please tell me where I can find the C-141 form to complete?

Thank you,

Mitzi Matthews
