HISTORY OF OIL OR GAS WELL

6—0745

It is of the greatest importance to have a complete history of the well. Please state in detail the proposed redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was pulled or left in the well, give its size and depth. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

This well drilled as per specifications noted on approved Notice of Intention to Drill.
