RE: Yates * Dayton Water Line (Gushwa DX #1) * 30-015-21703 * 2RP-2824

Chase,

The OCD would like to request some additional information before this work plan is approved. Because of the large amount of contamination that must be left in place due to the railroad ROW, the OCD is requesting a full water well investigation. Please include all wells within a 1500 foot radius from the center of the release. This information should be included in the site ranking, and may potentially increase your site ranking score. We would also like to review some baseline water quality information. The OCD also requests further chloride delineation in the area of S1. While we appreciate your chloride projection chart, we do need lab verification. The target delineations goal is 250mg/kg or at depth background, whichever is greater.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Mr. Bratcher/Mrs. Patterson,

Yates Petroleum Corporation is submitting the attached work plan for the above captioned well. The plan is being submitted in response to the C-141 report dated February 18, 2015.

If there are no objections with the scope of work described in the plan, Yates will have a contractor begin work on or after September 1, 2015.

If you have any questions, feel free to call me at (575) 748-4171

Thank you.

Chase Settle, M.S.
