NATURE OF RELEASE

Type of Release Produced water and oil	Volume of Release 2 bbls Oil & 5 bbls Produced Water	Volume Recovered 0
Source of Release Oil Well	Date and Hour of Occurrence 4/12/15	Date and Hour of Discovery 4/12/15
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

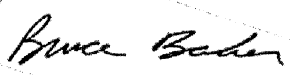

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
Pop off valve on generator popped off due to pressure.

Describe Area Affected and Cleanup Action Taken.*

The release area covered 10,860 sq ft of the lease pad and 41,855 sq ft of the pasture of overspray. Three points within the release area on the lease pad were sampled at the surface and with depth, and one point within the overspray was sampled at the surface. All soil samples were field tested for chlorides and organic vapors. Representative samples from each point were taken to a commercial laboratory analyses. Based on the laboratory analyses, the release area was scraped down 6 inches (Figure 2). The excavated soil was taken to a NMOCD approved facility for disposal. Clean caliche was imported to the site to serve as backfill. The scrape was backfilled to the surface with the imported soil and contoured to the surrounding area. The overspray area was washed with clean water and dawn dish soap to remove any staining.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
