Attachments: 15 8 Point Comp 1 & 2.pdf

All,

Apache is requesting to backfill on the Crow Fed #35 (2RP-2677). The excavated material was stockpiled on plastic, aerated, and left undisturbed for several days to facilitate natural attenuation and off-gassing of contaminants. Attached is the excavation plat and lab data on the backfill. If you have any questions, please let us know. Otherwise, we await your approval.
