Lupe,

The BLM APPROVES your work plan as written with concurrence of the stipulation set forth by the NMOCD.

The BLM approval/acceptance does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Shelly J Tucker

RE: COG * Loco Hills 33 #6 SWD * 30-015-39478 * 2RP-2844

Lucas,

Thank you for the additional information. Your work plan for the above listed site is approved with the following stipulations:

- Please further delineate the area of LD4 for chlorides, with a delineation goal of 250mg/kg (field samples are acceptable).

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather,

I have attached the delineations results with EC and a site map. Also I sent some of the samples off delineation.

Lucas,

Can you send your field titration results? The lab samples here aren't quite enough to approve excavation depths.
