All,

We need to proceed as OCD requires. Also I need a map of the affected area so submit with my report. Can you send me anything you have to indicate where you pulled samples and what each sample showed?

Thank you,

Billy Doucette

Audra,

I have received the lab data for the Fanning (see attached). The site is still contaminated at two of the four sample locations. The OCD will require further delineation in these two locations. Once we receive lab data from the delineation we can draft a work plan for the remediation. It may be best to run this data by Mike Bratcher and ask him if he wants to see anything in specific during the delineation process. I can talk to Mike about it if you want. Just let me know how you want to proceed.

Respectfully,

Sheldon L. Hitchcock
