Subject: RE: Former Maljamar Station - Work Plan
Date: Wednesday, January 14, 2015 9:55:00 AM

Ben,

Your proposal for remediation of the former Plains Maljamar Station site is approved with the following conditions:

- Soils intended for onsite bio-remediation should be arranged in 6"-8" lifts, but no more than 12" lifts.
- Once bio-remediation cell/cells have been constructed, representative samples are to be obtained for laboratory analyses, to establish a baseline. A sampling schedule should then be established.
- Advise OCD once the placement of any liner has been determined.
- Sidewall sample analytical data is to be submitted to OCD for review in areas where excavation has been proposed to be limited due to roadways, or other limitations.
- Like approval by BLM.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Mr. Bratcher,

Basin Environmental, on behalf of Plains, is pleased to submit the attached *Remediation*

Summary & Risk-Based Site Closure Proposal for Plains' Former Maljamar Station site in Eddy County (NMOCD Reference #2RP-2504). Basin is prepared to begin the proposed remediation activities upon your review and approval.

If you should have any questions, comments, or concerns, please do not hesitate to contact me by telephone or email.

Thank you for your time and consideration.

Respectfully,
Ben J. Arguijo
