NATURE OF RELEASE

Type of Release Water and Drilling Mud	Volume of Release 8 bbls Water and Drilling Mud	Volume Recovered NA
Source of Release Tanker Truck	Date and Hour of Occurrence 8/17/2015 @ 17:00 MDT	Date and Hour of Discovery 8/17/2015 @ 17:00 MDT
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.*		
Describe Cause of Problem and Remedial Action Taken.*		
<p>The landing gear of a tanker truck settled into the soil due to its weight. The tanker truck was full of water, which was used to produce drilling mud as part of the ongoing construction activities at the pipeline. After the tanker truck was empty, the construction crew leveled the truck and discovered that a pipe at the bottom of the truck ruptured and released approximately 8 bbls of a mixture of stagnate water and old drilling mud.</p>		
Describe Area Affected and Cleanup Action Taken.*		
<p>Enterprise excavated the contaminated soil and performed soil sampling in accordance with NMOCD remediation guidelines and Enterprise's General Release Notification, Response, and remediation Plan (dated March 9, 2015). Please find an attached report including analytical data to demonstrate cleanup is complete. The excavated soil was shipped to a disposal facility and the area was backfilled with clean fill dirt.</p>		
<p>I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.</p>
