RE: Devon * Todd 36 State #1 * 30-015-20341 * 2RP-3405

Rebecca,

Thank you for the map and the additional delineation. Your work plan for the above listed release is approved with one exception, the OCD would like to see a 4' excavation with a liner across the impacted area.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Good Morning,

I apologize for the delay. Our field tech for this location has been out in the field all week. I managed to catch him this morning.

Thank you

Rebecca,

Can you send a site map showing TT1 and TT2?

Thanks,

Hi Heather,

Per your request: I have attached a revised remediation plan for the above location, to include the field data from the test trenches. Please let me know if you concur, or if you need any additional information.

Have great weekend!

Thank you,
Rebecca
