DIRT WORK * ON-SITE REMEDIATION SOIL TESTING * EXCAVATION * ELECTRICAL

25Jan16

To: Heather Patterson, New Mexico Oil Conservation Division, District II

Reference: Remediation Work Plan

Operator: Devon Energy Production Company

Location: Peridot 13 St 3H

API: 30-015-40778

Legals: UL. H, Sec. 12, T 19S, R29E, Eddy County

GPS: 32.6782 -104.0237 NM OCD: 2RP 3456

Site Information

This location is west of Highway 360 approximately two miles west of the intersection of Highway 360 and Grubbs Road. The area has very defined sand dunes with sparse vegetation present. The depth to groundwater is 150' based upon the Eddy County Depth to Ground Water. The New Mexico Office of the State Engineer's website list no groundwater data for the area.

The release is the result of a failed gauge. All released fluid remained on the caliche pad. The impacted area is 65' x 140'.

Work Conducted to Date

A delineation was conducted using a hand auger and soil samples were obtained from two sample points and field tested for chlorides. Laboratory analysis for Chlorides, TPH and BTEX was conducted on surface and 2' BGS samples (See attached results).

Proposal

I propose to mechanically excavate the top 4"-6" of the caliche pad. Fresh caliche will be used to reconstruct the pad which will be brought back to grade. All impacted soil will be transported to a division approved facility for disposal.

RE: PERIDOT 13 STATE 3H

Enclosed are the results of analyses for samples received by the laboratory on 01/19/16 14:40.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-15-7. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab accred certif.html.

Cardinal Laboratories is accreditated through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2

Haloacetic Acids (HAA-5)

Method EPA 524.2

Total Trihalomethanes (TTHM)

Method EPA 524.4

Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

Celey & Keene

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene
