**RE: ConocoPhillips \* James A Water Station \* 30-015-26761 \* 2RP-2436**

Kyle,

As per the condition of approval for the remediation proposal, this closure report is accepted, with the remediation of contamination left in place deferred to time of facility closure. Notation reflecting this deferment will be made in well file records.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson  
Environmental Specialist  
NMOCD District II  
Office (575)748-1283 ext.101  
Cell (575)703-0228
