**Subject:** RE: SALT DRAW 1 CLEAN UP

Crissy,

Both sample points are well above regulatory limits and will require additional excavation. I believe the site ranking is 10, which puts remedial goals for TPH at 1000 mg/kg, Benzene at 10 mg/kg and total BTEX at 50 mg/kg. I should be in the office most of the day today if you have any questions, please contact me.

Thank you,

Mike Bratcher

**Subject:** Fwd: SALT DRAW 1 CLEAN UP

Mike,

Attached the results from the requested samples at 6 feet below ground surface (HA1 6') and 7 feet below ground surface (HA1 7') in the area of B36 in the tank battery area. Please advise as soon as you can if we can close the excavated spill area.

Thank you!  
Crissy
