Dara - This just came in (though 4 weeks after-the-fact), so we did not discuss it. However, Oxy does have a R/W [NM-101331] for the SWD facilities. So I guess it is mine to handle.

Ms Purvis - and please forward this to the applicable Oxy staff -

You must submit a remediation plan to me for my approval.

I note that this facility has had several leaks through the years. Therefore please include in your remediation plan a discussion of why Oxy has had so many equipment failures at this location, and what replacements or rebuilding Oxy will propose to prevent any further such occurrences.

I notify Oxy at this time that further leaks or spills will place your R/W grant in a state of noncompliance, which may result in future termination of the R/W grant.

I am available to meet with you or with Oxy staff on site or elsewhere to discuss this issue.

Hi Randy, did we decide this was yours? I can't remember.

Happy New Year!

Dara

The BLM acceptance/approval does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.
