The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

\*\*\*\* External email. Use caution. \*\*\*\*

Lupe,

Question...your work plan references the Big Papi Federal Com 1 and the analyticals also reference Big Papi Federal Com 1. The API number used references the Big Papi Fed Com 2H. Is this for the Big Papi 1 or 2H?

If you have any questions or concerns, please do not hesitate to contact me.

Lupe,

Your proposal for partial remediation of the above referenced site is approved, however, due to the elevated chloride levels proposed to be left in place, and, the site being situated in a major drainage feature that terminates in the Pecos River, the site will be deferred, and remain open in OCD database. Like approval from BLM is required.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
