---

Dear Mr. McNeill:

The Land Office will defer to OCD on the question of sampling results and whether or not any remediation of that sampling site will be required.

We want to reiterate however that contaminated material may not be used in the pad rebuild. We will work with OCD to determine what levels of chlorides or other identified contaminants will be allowed in the rebuild materials.

Thank you again for your diligence on this project.

Will Barnes

**Subject:** Crossman 25 State Com. #1 - Water Sampling Results

To: NMOCD and NMSLO representatives

Attached is the summary of the water sampling results from the temporary well and upstream surface water at the Crossman 25 State Com. #1 and Concho's recommendation to proceed with the previously approved work plan by NMOCD. Please review, and if needed, I can setup a conference call with NMOCD, NMSLO and COG representatives to discuss.
