RE: Legacy Reserves Operating \* State CF 5 \* 30-005-60304 \* K-13-11s-27e \* Chaves County, New Mexico

Mr. Baeza,

The attached photos were taken at the above referenced Legacy well site. OCD will require a form C-141 be submitted to the Artesia District office, reporting the release. We will then need a proposal for remediation of this site, based on a delineation of contaminants, and, OCD rules and guidelines.

If you have any questions or concerns, please contact me.

Thank you,

**Mike Bratcher**  
**NMOCD District 2**

Amber from SLO sent these photos to me and I thought you might find them interesting considering it is in D2....

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.
