**RE: Lime Rock Resources \* Atoka San Andres Unit #141 \* 30-015-10550 \* 2RP-3627**

Mike,

Your closure request for the above listed site is conditionally approved. Because of the slightly elevated chlorides left in place, the OCD will require plant growth. In the event that plant material does not reestablish, 2RP-3627 will be reopened and further remediation may be required.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Dear Mike Bratcher,

R.T. Hicks Consultants is pleased to send the Final Closure Report for release at Lime Rock Resources II-A, L.P. Atoka San Andres Unit No.141. A copy of the analytical report received from Cardinal Laboratories for the Atoka San Andres Unit No.141 release will be send in a separate e-mail. A hard copy Final C-141 form requesting closure for the release at the Atoka San Andres Unit No.141 will be hand delivered to the Artesia NMOCD office.

Sincerely,

Mike Stubblefield
