RE: Linn Operating * Skelly A Battery (Skelly 226) * 30-015-29182 * 2RP-2352

EL,

This work plan is approved with the following conditions:

- Excavation depths for SP1 through SP9 are approved as written;
- SP10 through SP13, please take a confirmation lab sample to document any contamination left behind;
- SP14 and SP15, the OCD will require a clean bottom-hole, confirmation sample (lab) of TPH at closure;
- Like approval by BLM is required.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
