NATURE OF RELEASE

Type of Release: Oil	Volume of Release: 3 bbls	Volume Recovered: 0
Source of Release: Polyline	Date and Hour of Occurrence 06/20/2012 9:00 am	Date and Hour of Discovery 06/20/2012 9:30 am
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Terry Gregston - BLM Mike Bratcher - NMOCD	
By Whom? Joe Hernandez	Date and Hour: 06/22/2012 3:00 pm	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

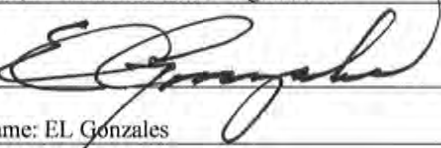

Describe Cause of Problem and Remedial Action Taken.*

Fuse on polyline developed hole. Sprayed oil and water onto open field.

Describe Area Affected and Cleanup Action Taken.

On April 11, 2014, DFSI personnel were on site to obtain samples within the leak area. Ten samples were obtained and field sampled for chloride levels, as well as BTEX. The BTEX samples were performed using a Mini Rae Photoionization Detector (PID). All clean field samples under NMOCD and BLM regulatory guidelines were submitted for laboratory analysis at Cardinal Laboratories of Hobbs, NM to obtain confirmation. A work plan was submitted to NMOCD and BLM on December 21, 2015, and approved by BLM on February 18, 2016, with stipulations, and NMOCD on February 4, 2016. Beginning March 9, 2016, DFSI personnel were on site to till and blend the soil within the release area, with the exception of the area surrounding SP3. Due to elevated chloride concentrations, SP3 was excavated to a depth of 4' bgs. At the base of the excavation, a river rock layer was installed to inhibit the downward migration of chlorides and TPH, as per BLM approval of the Work Plan. Prior to backfilling, four-wall composite samples were collected and submitted for laboratory analysis at Hall Environmental of Albuquerque, NM to obtain confirmation. The excavation was backfilled with clean, imported topsoil to ground surface and contoured to the surrounding area. Contaminated soil was properly disposed of at an NMOCD approved facility. On March 28, 2016, the site was seeded with BLM Mix #2.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
