RE: DCP \* W-1-3-1-1 & W-1-3-1 Pipeline \* fAB1507654570 \* 2RP-2890

Mr. Bebbington,

The OCD does not generally approve work plans before a delineation has been performed. In this case, since you are only proposing to excavate the top 12" of soil, we are ok with you proceeding. If contamination does not clean up at 12", please contact us with delineation numbers.

Keep in mind, if chlorides are encountered, the OCD has a vertical chloride delineation goal of 250mg/kg.

If contamination does clean up at 12", the OCD will require clean bottom hole and side wall samples at closure.

BLM concurrence is required at this location.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson

Hello-

I submitted this workplan a while back but never got a response. We will be proceeding soon on cleanup.

**Jon Bebbington**
