**RE: Apache \* NB Tween State 1 \* 30-015-35915 \* 2RP-3511**

David,

Your work plan for the above listed site is approved with the following stipulations:

- Please excavate S-2 to 1’;
- Excavate S-3 and S-4 to 18”;
- Submit excavation depths achieved in the separator battery (S-5, S-6, and S-7) in the closure document;
- If excavation depths plus bioremediation can effectively remediate the contamination, please pull a confirmation sample and the site can be closed. If equipment prohibits remediation, the battery portion of this release will be deferred until site abandonment.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson  
Environmental Specialist  
NMOCD District II  
Office (575)748-1283 ext.101
