RE: COG * Loco Hills SWD Mainline * fAB1514733316 * 2RP-3010

Amanda,

The OCD concurs with BLM approval of this work plan. Once chlorides have been flushed and plant growth reestablished, the OCD will request a second delineation at S1 and S2 for closure. If at the end of your monitoring phase, plant growth is not established and chlorides are still present at the surface, the OCD will require further remediation efforts.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Heather Patterson

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.
