RE: COG \* Loving 1 St 2 \* **2RP-3666** \* DOR: 4/12/16

Cliff,

Your proposal for remediation of the above referenced release is approved. Target goal for chloride delineation is 250 mg/kg, and as discussed, field screens are acceptable for the SP-2 delineation. It is OCD's understanding that the proposed barrier will be clay/bentonite. Please advise if liner medium is revised, and, once remedial activities have been scheduled.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

**Subject:** COG Loving 1 State #2 - Remediation Plan

Mike,

This e-mail is to confirm our discussion concerning the remediation plan for the COG Loving 1 State #2 release. I have attached the information packet that we used in our discussion with a cover page describing the remediation plan that we agreed upon.

If you would please reply back via e-mail with your concurrence on this plan, it would be greatly appreciated.

Thanks, Cliff
