**Subject:** Re: State SWD #3 flowline Proposal

With Jennifer's clarifications, BLM concurs with Mike Bratcher's conditions, and likewise approves the cleanup plan with his conditions.

BLM must still approve any backfilling and/or liner installation on BLM-managed lands.

Jennifer,

Your proposal for remediation of the above referenced release is approved with the following conditions of approval:

- > Target goal for chloride delineation will be 250 mg/kg or background levels. At the area identified as "Pt 1" , you may want to delineate prior to excavating.
- > A representative sample will need to be obtained and tested for hydrocarbon constituents.
- > Advise OCD prior to installation of any liner.
- > Sidewall samples will be required in excavations where lateral extent of impact has not been previously defined.
- > Notify OCD once remedial activities have been scheduled.
- > Like approval from any other applicable regulatory agency.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Thank you,

Mike Bratcher

All,

Please see the attached plan for the release located in Section 19, T17S, R31E at 32.816536, and -103.916730 in Eddy County, NM.

Please approve the attached plan with any conditions of approval required to begin work as soon as possible.

Thank you for your time reviewing this plan.
