NATURE OF RELEASE

Type of Release Hydrocarbons	Volume of Release 20 bbl	Volume Recovered 0
Source of Release WW Equipment Emergency vent	Date and Hour of Occurrence 15Feb12 0600hrs	Date and Hour of Discovery 15Feb12 0600hrs
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Jim Amos-BLM Mike Bratcher-NM OCD	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. N/A	

If a Watercourse was Impacted, Describe Fully.*
N/A

Describe Cause of Problem and Remedial Action Taken.*

Pipe shavings clogged the blowcase dump valve causing an unplanned release. The affected area was a plume shape extending from the vent pipe NE for approx 1500'. Upon discovery, a cleanup crew was dispatched to the area to begin containing the free standing liquid and to prevent migration of the liquids.

Describe Area Affected and Cleanup Action Taken.*

All contaminated material that was stockpiled during remedial clean up was transported to a division approved disposal facility. A small area, 20'x 10' x 4' just outside the fence was excavated and soil samples obtained. Lab results indicated contaminant levels at or below closure limit levels. Results were presented to Mike Bratcher, NM OCD, and his approval was given for closure. The over spray area was disked and cross disked. The area in the middle of the plume that had been scrapped free of liquid was disked and seeded with a BLM approved seed mixture. All work was conducted in accordance with the submitted and approved work plan.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
