If a Watercourse was Impacted, Describe Fully.*

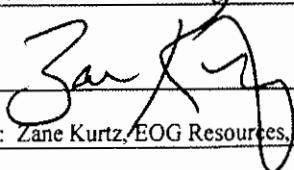

Describe Cause of Problem and Remedial Action Taken. * Approximately 15 bbls was released from a fill line being left closed by an oil hauler. Approximately 9 bbls were collected and the spill was contained within the pad location.

Describe Area Affected and Cleanup Action Taken. *Initial C-141 stated that impacted area will be excavated, stock-piled on poly-plastic, and transported to an approved disposal facility. Clean soil will be backfilled within the excavated area to normal grade.

On August 17, 2016, LAI personnel collected soil samples at 3 locations around load line to confirm area was cleaned up per initial C-141. TPH was less than method reporting limit in samples from 0 to 1 foot and chloride was less than 250 mg/Kg.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
