---

This well is located on federal surface but a state lease. The state can take the lead since it was a state well that created the environmental action. Just keep me in the loop.

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

*Shelly J Tucker*

The BLM acceptance/approval does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Shelly,

I sent this to SLO, but then Talon called and they thing this whole thing is on BLM land. Can you look at it and let me know if it's your surface?

Thanks,

Heather Patterson

Amber,

This is a plugged well that OCD is working on for final reclamation. They had an old C-141 on record so I asked for closure. Then I looked it up on google Earth...

This is 2RP-1572. I think this is a good candidate for SLO involvement. Let me know what you think.
