RE: Work Plan

Legacy Reserves, LP
PO B1 Fee 2H
A-01-16S-24E 2622 FNL & 660 FEL
2RP-3920

Mike,

Trinity Oilfield Services is representing Legacy Reserves LP. in the Accidental Release (AR) for the PO B1 Fee 2H. On August 21st the battery was stuck by lightning during an evening storm. According to Legacy the fire dept. was called to extinguish the fire. A backhoe and vac truck were used to contain the fluid that was released. Approximately 143bbl were released and 25bbl was recovered. The affected area is primarily on the location and the lease road. A small amount of fluid did leave the road area.

Delineation

Trinity performed a sampling event on September 12, 2016. Six sample points were selected and samples were pulled from surface, 2', 4', & 6'. The results of this event and a sample map can be found attached as Exhibit A & B. It is believed that groundwater is grater than 100'. This map can be found in Exhibit C.

Conclusion

After carefully analyzing all of the data and consulting with our client, Trinity is proposing the following remediation. Trinity would like to excavate the Effected Area (EA) in SP1, SP2, and SP4 to depth of 2'. Haul the contaminated soil to the nearest disposal. Backfill the EA with clean soil appropriate for the location. The old facility will be dismantled and a new one put back.

Upon completion of this work plan Trinity will submit a closure report. Please feel free to contact me with any questions or concerns regarding this matter.

Sincerely,

Todd Roberson
President
Trinity Oilfield Services & Rentals, LLC.

CC Manuel Soriano, Legacy Reserves, LP.

RE: P O B - 1 - FEE #2H

Enclosed are the results of analyses for samples received by the laboratory on 09/13/16 8:50.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-16-8. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Notes and Definitions

S-06	The recovery of this surrogate is outside control limits due to sample dilution required from high analyte concentration and/or matrix interference's.
QR-03	The RPD value for the sample duplicate or MS/MSD was outside if QC acceptance limits due to matrix interference. QC batch accepted based on LCS and/or LCSD recovery and/or RPD values.
QM-07	The spike recovery was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
ND	Analyte NOT DETECTED at or above the reporting limit
RPD	Relative Percent Difference
**	Samples not received at proper temperature of 6°C or below.
***	Insufficient time to reach temperature.
-	Chloride by SM4500Cl-B does not require samples be received at or below 6°C Samples reported on an as received basis (wet) unless otherwise noted on report

Release Notification and Corrective Action

OPERATOR

☒ Initial Report ☐ Final Report

Name of Company – Legacy Reserves	Contact – Manuel Soriano	
Address – 303 W. Wall St. Suite 1800	Telephone No. – 432-269-8806	
Facility Name – PO B1 Fee 2H	Facility Type - Battery	
Surface Owner - Private	Mineral Owner - Private	API No. – 30-015-34752

LOCATION OF RELEASE

Unit Letter A	Section 01	Township 16S	Range 24E	Feet from the 2622	North/South Line North	Feet from the 660	East/West Line East	County Eddy
------------------	---------------	-----------------	--------------	-----------------------	---------------------------	----------------------	------------------------	----------------

Latitude 32.9568291 Longitude-104.535614

NATURE OF RELEASE

Type of Release – Produced Water	Volume of Release - 143	Volume Recovered - 25
Source of Release – Tank Fire	Date and Hour of Occurrence – 8/21/16	Date and Hour of Discovery 8/21/16
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? District 2 Office	
By Whom? Manuel Soriano	Date and Hour 8/22/16	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

On the evening of the 21st the battery was struck by lightening. A subsequent fire began and the tanks leaked. During the storm rain water caused the produced water to run off of location. A vacuum truck was called and a backhoe to contain the liquid along with the fire dept. to put the fire out.

Describe Area Affected and Cleanup Action Taken.*

The affected area is mostly on location with some fluid running down the lease road. The battery has been removed and a work plan is being written. After delineation and a work plan being approved the area will be remediated.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
